STATE TOTAL	382	\$632,717	\$36,964	\$372	\$670,053

- 1/ Cost-shares earned includes the amount earned by producers under the annual and long-term provisions of the program. It does not include \$91,519 obligated for future years under long-term agreements.
- 2/ The Soil Conservation Service provides assistance for practices which are technical in nature or require engineering assistance. The amount shown was transferred to SCS for this assistance.
- 3/ By law, cost-share earnings of less than \$200 are increased. These are called small payment increases.

POOLING AGREEMENTS

The 1975 programs provided cost-sharing assistance to producers through pooling agreements. Under a pooling agreement, several producers may join together to perform practices which will solve a mutual conservation or pollution problem involving their farms. To be a valid pooling agreement, there must be a substantial pooling of resources, efforts or other contributions, by two or more producers on two or more farms.

The Nevada State ASC Committee strongly encourages the use of pooling agreements. Generally, pooling agreements solve community-wide problems and greatly benefit the general public. The following is a summary of pooling agreement activity in Nevada.

SUMMARY OF POOLING AGREEMENTS

County	No. of Agreements	No. of Farms Participating	Cost-Share Assistance
Clark	2	29	\$ 35,000
Douglas	5	13	33,834
Elko	1	4	2,282
Lincoln	1	10	12,000
Lyon	4	43	36,700
STATE TOTAL	13	99	\$119,816

LONG TERM AGREEMENTS

The 1975 ACP continued the concept in conservation cost-sharing which was initiated under the 1974 Rural Environmental Conservation Program--that of long term conservation contracting. Under this provision, a producer could execute a long term agreement with ASCS to perform approved practices over a period of not less than three years nor more than ten years. With the approval of the long term agreement, the producer was guaranteed of receiving cost-sharing assistance for the eligible conservation measures he installed during the agreement period.

To qualify for a long term contract, the producer had to agree to carry out all conservation work outlined in a conservation plan for his farm or ranch. Thus, the farmer is assured the practices he performs will compliment each other and the finished product will be a good conservation farm.

The following is a summary of long term agreement activity.

SUMMARY OF LTA'S

County	Total No. of Agreements	No. Producers Earning 1975 C/S Payments	C/S Payments Earned 1975	Total Amount Committed For Future Yrs.
Churchill	10	9	\$21,651	\$66,124
Lyon	3	3	5,380	18,620
Pershing	1	1	2,203	175
Washoe	1	1	1,650	6,600
STATE TOTAL	15	14	\$30,884	\$91,519

SPECIAL PROJECTS

The 1975 Agricultural Conservation Program provides for the development of special projects to encourage the performance of needed conservation and pollution abatement measures. Under the special project concept, deviation from regular program provisions such as increased cost-share rates or development of new practices is permitted to encourage farmers to carry out the needed work. Other Federal, State and local agencies and organizations are also encouraged to join with the farmers and ASCS. Through special projects, emphasis is placed on solving community-wide conservation problems which provide greater public benefits.

The State committee reserved a portion of the program allocations which were allocated to counties for the following special projects:

SUMMARY OF SPECIAL PROJECTS

County	Type of Project	No. Participants	Total Assistance	Acres Served
Clark	Irrigation Drainage	10	\$25,000	400
Douglas	Irrigation Water Control Structures	4	31,000	398

LIVESTOCK FEED PROGRAM

A major activity in 1975 in the Elko, Las Vegas and Winnemucca ASCS offices was that of closing out the Livestock Feed program. A Livestock Feed Program was approved for Clark, Elko, Eureka, Lander, Lincoln, Nye, and White Pine Counties in September 1974. The counties were declared disaster areas by the Governor of Nevada and the Secretary of Agriculture because of severe drought conditions during the spring and summer of 1974. The program was initiated in September 1974 and remained in effect through May 31, 1975. Producers will be given until June 30, 1975 to feed up grain purchased under the program. The CCC grain was delivered at Federal expense to several points in each county. Producers were responsible for delivery of the grain from these points to their ranches and for the processing of the grain. The following is a summary of all program activities.

The CCC-owned grain was sold to eligible producers at the county loan rate for the grain. In Nevada this amounted to \$44.40/ton for oats and \$35.80/ton for milo--the only two grains available.

County	No. of Applications		No. of Animals For Which Grain Requested	Tons of Grain Purchased		Amount Paid For	
	Filed	Approved		Milo	Oats	Milo	Oats
Clark	12	8	2,078	124	699	\$ 4,439	\$ 31,040

BEEKEEPER INDEMNITY PAYMENT PROGRAM

Under Public Law 91-524, the Secretary of Agriculture is authorized to make indemnity payments to beekeepers who, through no fault of their own, have suffered losses of honeybees as the result of use of pesticides near the property on which his beehives were located.

To qualify for indemnity payments, a beekeeper must report the number and locations of his apiaries to the county office by July 15 each year. If apiaries are moved, amended reports must be submitted.

Beekeepers are required to report expected losses due to pesticides within three days from the date the loss is discovered. Damaged apiaries must be inspected within fourteen days after the damage is noted. Beekeepers must file applications with the ASCS office serving the county where their headquarters are located by April 1 of the year following the year of the loss.

Activity under the Beekeeper Indemnity Payment Program in Nevada in 1975 was minimal. Two applications were filed, approved and paid: One in Churchill County for bee losses during 1974 and one in Washoe County for losses during 1975. Total amount paid under both applications totaled \$4328.
